Acknowledgements

- A small vote of thanks for all who have helped me in this journey of App Development – (This goes out to Miss Smita especially) Thank you Mr.Ken Khan and everyone attending this session . Big thanks to Miss Smita again .

About Me..

- **Student's Photograph**

- **Student's Introduction**

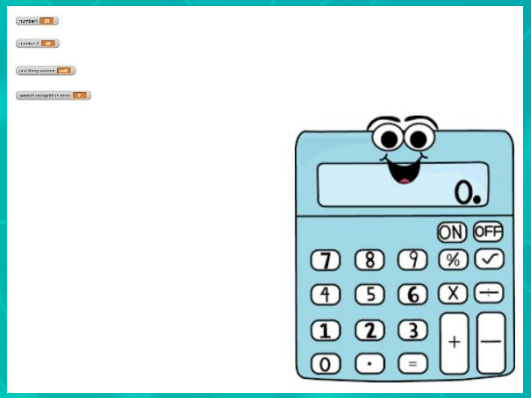
Hello everyone , my name is Hannah Rose I am in Year 6 in Al Muna school and I am from Malaysia . I like all subjects like Math , English etc but my Favorite is Computing and Coding . I have always been interested in coding and technology ever since I heard about this AI designed bot called Siri .

About My Internship with Clevered..

- My internship journey with Clevered was very fun I enjoyed learning with the class and Miss Smita and even to have small visits from Mr.Ken himself .
- I have earned a few rockstar badges for doing my homework .

About App..

- **App's Main Menu**



- **App's Introduction**

My app is called SensoCalculla the app is a female calculator which does addition , multiplication , subtraction and division . My app is called SensoCalculla because it is a sensory calculator which can hear and talk .

How do I use the App?

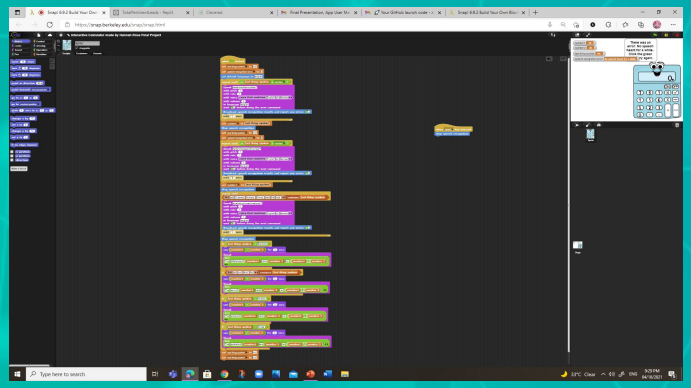
This is how to use SensoCalculla :

SensoCalculla will say “Enter the first number” so say your first number (You might have to say it a few times for it to work) . Then she will say “Enter the second number “ so again say you second number (You might also have to say it a few times) then finally choose which of these you want to do : Add , Subtract , Multiply or Divide . Now SensoCalculla will tell you your answer . So that is basically how SensoCalculla works !!!!!

SensoCalculla

(This will be repeated for each option of the App)

- **Screenshot/ Pic of each option/screen of the App**



This is how to use SensoCalculla : SensoCalculla will say “Enter the first number” so say your first number (You might have to say it a few times for it to work) . Then she will say “Enter the second number “ so again say you second number (You might also have to say it a few times) then finally choose which of these you want to do : Add , Subtract , Multiply or Divide . Now SensoCalculla will tell you your answer . So that is basically how SensoCalculla works !!!!!
